# Maths Answers lesson 1:

## Compare lengths

White Rose Maths

1 Write  $<$ ,  $>$  or  $=$  to compare the statements.

Complete the sentences.

shorter

longer

The rubber is longer than the sharpener.

The sharpener is shorter than the rubber.

2 Write  $<$ ,  $>$  or  $=$  to compare the statements.

a)  $9 \text{ cm} < 23 \text{ cm}$

b) fifty metres  $= 50 \text{ m}$

c) one metre  $> 1 \text{ cm}$

5 Write  $<$ ,  $>$  or  $=$  to compare the statements.

a)  $39 \text{ cm} + 9 \text{ cm} > 47 \text{ cm}$

b)  $22 \text{ m} - 6 \text{ m} > 0 \text{ m} + 15 \text{ m}$

c)  $4 \text{ cm} + 13 \text{ cm} < 20 \text{ m} - 3 \text{ m}$

6

$5 \text{ m} = 5 \text{ cm}$

a) Why is the statement wrong?

Talk about it with a partner

b) Write  $<$  or  $>$  to correct the mistake.

$5 \text{ m} > 5 \text{ cm}$

3 Write digits in the boxes to make the statements correct. e.g.

a)  $40 \text{ cm} < 41 \text{ cm}$

b)  $14 \text{ m} < 15 \text{ m}$

c)  $14 \text{ cm} > 10 \text{ cm}$

d)  $12 \text{ m} < 17 \text{ m} < 20 \text{ m}$

Is there more than one answer for each?

4 Would you measure each one using centimetres or metres?

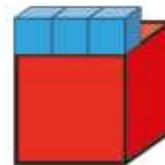

Tick your answer.

centimetres metres

- |                               |                                     |                                     |
|-------------------------------|-------------------------------------|-------------------------------------|
| a) the height of a baby       | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| b) the length of a pencil     | <input checked="" type="checkbox"/> | <input type="checkbox"/>            |
| c) the height of a school     | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
| d) the height of your teacher | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |

What else would you measure in metres?

6 One large cube is three times as long as one small cube.

One small cube is 5 cm long.

a) How long are 2 small cubes?

$10 \text{ cm}$

b) How long are 10 small cubes?

$50 \text{ cm}$

c) How long is 1 large cube?

$15 \text{ cm}$

d) How long are 2 large cubes?

$30 \text{ cm}$

## Red task:

### Developing

- 1a. Various answers, for example: 1m 40cm; 1m 50cm; 1m 60cm.  
 2a. A: Wendy; B: Craig; C: Wendy  
 3a. A, C, B  
 4a. B < A

### Developing

- 1a. Various answers, for example: 2m 55cm; 2m 15cm; 2m 65cm.  
 2a. Luke is correct because his ribbon is 45cm, whereas Alice's is 50mm = 5cm. 5cm < 45cm.  
 3a. The statement is incorrect because 500mm = 50cm. The correct statement is: 500mm < 60cm.

## Gold task:

### Greater Depth

- 9a. Various answers, for example: 2m 153cm; 2m 64cm; 311cm.  
 10a. A: Wendy; B: Craig; C: Wendy  
 11a. A, C, B  
 12a. C > A > B

### Greater Depth

- 7a. Various answers, for example: 575cm; 6m; 5m 132cm.  
 8a. Elliot is correct because his dog's lead is 1m 128cm = 2m 28cm, whereas Theresa's is  $1\frac{3}{4}$ m = 175cm.  $1\frac{3}{4}$ m < 1m 128cm.  
 9a. The statement is incorrect because  $4\frac{3}{4}$ m = 475cm and 3m 154cm = 4m 54cm. The correct statement is:  $4\frac{3}{4}$ m  $\leq$  3m 154cm.

## Deepen the Moment:

1. Four brothers and sisters are comparing the lengths of the televisions in their house.

 Adrian: The television screen in mine and Adam's room only measures  $1\frac{1}{4}$  m.

 Mahida: The TV screen in the study is shorter than the television in the boys' room. Its digits are all odd.

 Hanna: The television in the living room has a screen that is  $1\frac{3}{4}$  m long which is longer than the TV in the study.

 Adam: The length of my television is no greater than 234cm.

Investigate the lengths of each television and arrange the length in descending order.  
 Various answers, for example: living room =  $1\frac{3}{4}$  m, boys' room =  $1\frac{1}{4}$  m, study = 1m 15cm.

### Red task:

#### Developing

- 1b. Various answers, for example: 60cm; 70cm; 80cm.  
 2b. A: Mia; B: Danny; C: Mia  
 3b. C, B, A  
 4b. A > B

#### Developing

- 1b. Various answers, for example: 2m 20cm; 2m 40cm; 2m 70cm.  
 2b. Emme is correct because her ribbon is 60cm, whereas Alfie's is 80mm = 8cm. 8cm < 60cm.  
 3b. The statement is incorrect because 90mm = 9cm. The correct statement is: 70cm > 90mm.

### Gold task:

#### Greater Depth

- 9b. Various answers, for example: 300mm; 29cm; 31cm 7mm.  
 10b. A: Talha; B: Jane; C: Jane  
 11b. A, C, B  
 12b. B < A > C or C < A > B

#### Greater Depth

- 7b. Various answers for example: 375cm; 5m; 4m 112cm.  
 8b. Phoebe is correct because her dog's lead is 68cm 80mm = 76cm, whereas Alan's is  $\frac{3}{4}$  m = 75cm.  $\frac{3}{4}$  m < 68cm 80mm.  
 9b. The statement is incorrect because  $5\frac{1}{2}$  m = 550cm and 4m 133cm = 533cm. The correct statement is:  $5\frac{1}{2}$  m  $\geq$  4m 133cm  $\leq$  547cm.

### Deepen the Moment:

2. Travel through the maze following the pattern below.

Greater than, less than, greater than, less than, greater than

|         |         |                   |                  |                    |
|---------|---------|-------------------|------------------|--------------------|
| Start → | 768mm → | 76cm<br>12mm ↓    | 19cm 8mm         | $1\frac{1}{4}$ m   |
|         | 400cm   | $\frac{1}{2}$ m ↓ | $5\frac{3}{4}$ m | 291mm              |
|         | 5m 28cm | 392cm →           | 94cm 7mm →       | $4\frac{3}{4}$ m → |
|         | 279cm   | 45mm              | 4m 123cm         | 100cm              |

→ Finish

Investigate if there is more than one route.  
 Various answers, for example: one shown above.

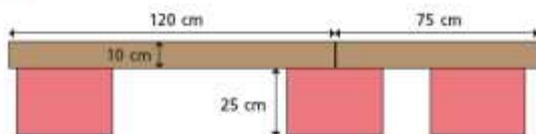

# Maths Answers Lesson 3:

## Add lengths

1 Scott builds a bridge using planks.

a) What is the total length of his bridge?  cm

b) What is the height of his bridge?  cm

2 Complete the additions.

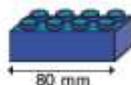

a)  $25\text{ cm} + 75\text{ cm} = \text{1 m}$

b)  $10\text{ cm} + 50\text{ mm} = \text{15 cm}$

c)  $1\text{ m } 20\text{ cm} + \text{80 cm} = 2\text{ m}$

d)  $52\text{ mm} + \text{8 mm} = 6\text{ cm}$

3 Red bricks are 50 mm long.  
Blue bricks are 80 mm long.

a) Whitney and Eva make patterns using the bricks.  
How long is each pattern?  
Give your answers in centimetres.

Whitney

Whitney's pattern is  cm long.

Eva

Eva's pattern is  cm long.

b) Draw some red and blue bricks to make a pattern that would be exactly 36 cm long.

3 Brett is 115 cm tall.

His brother is 20 cm taller.

How tall is Brett's brother?

Write your answer in metres and centimetres.

m and  cm

4 Dora builds a tower that measures 1 m and 5 cm.

Annie builds a tower that measures 80 cm.

Dexter builds a tower that measures 95 cm.

They put their towers together to make one high tower.

How tall is their new tower?

The new tower is  cm tall.

This is the same as  m and  cm.

© White Rose Maths 2019

6 Jack, Tommy and Alex took part in a hop, skip and jump competition.

Their distances are shown in the table below.

Complete the table to show the total distance each child travelled.

| Name  | Hop   | Skip  | Jump      | Total     |
|-------|-------|-------|-----------|-----------|
| Jack  | 80 cm | 60 cm | 1 m 20 cm | 2 m 60 cm |
| Tommy | 70 cm | 1 m   | 1 m 10 cm | 2 m 80 cm |
| Alex  | 75 cm | 75 cm | 1 m       | 2 m 50 cm |

7 Esther builds a tower using some bricks.

Her tower is 24 cm tall.

Which bricks could she have used?

Various answers

How many different answers can you find?

## Red task:

### Developing

- 1a. Maurice, because Carla = 2m 65cm or 265cm; Terri = 2m 55cm or 255cm and Maurice = 2m 95cm or 295cm  
 2a. 6m 35cm or 635cm  
 3a. 5m 70cm  
 4a. 95cm (60cm + 35cm)

### Developing

- 1b. Black and silver: 430cm + 3m 15cm = 7m 45cm  
 2b. Bus, scooter and car: = 175mm or 17cm 5mm; lorry, scooter and car: = 195mm or 19cm 5mm.  
 3b. C is the odd one because it is 6m 35cm whereas A and B are 6m 95cm.

## Gold task:

### Greater Depth

- 9a. Paula, because Yasmin = 292cm 5mm; Paula = 293cm 7mm and James = 289cm 6mm.  
 10a. 1m 83cm 6mm  
 11a. 9m 22cm 4mm or 9m 224mm  
 12a. 456mm or 45cm 6mm (75mm + 32cm + 61mm)

### Greater Depth

- 7b. Blue, green, gold and purple: 76cm 3mm + 532mm + 1  $\frac{1}{2}$  m 13cm + 37mm = 2m 96cm 2mm  $\frac{2}{2}$   
 8b. Car B, D and E = 192cm; C, D and E = 176cm 5mm  
 9b. A is the odd one out because it is 1m 10cm 6mm whereas B and C are 1m 08cm 2mm.

## Deepen the Moment:

1. The aliens are trying to reach different items on the three shelves. They need to climb on top of each other in order to reach the items.

Shelf A = 263cm  
 Shelf B = 3  $\frac{3}{4}$  m 6cm  
 Shelf C = 132cm 140mm

Not drawn to scale

Pog: 564mm  
 Jib: 31cm 8mm  
 Bax: 21  $\frac{1}{2}$  cm  
 Nub: 448mm  
 Zom: 18  $\frac{1}{2}$  cm

Investigate what combination of aliens could group together to reach each item. There are five of each type of alien that can be used. Various answers, for example:  
 Shelf A: 1 Pog, 2 Jibs, 2 Baxs, 1 Nub and 3 Zoms = 263cm 3mm  
 Shelf B: 5 x Nubs, 1 x Pog, 2 Jibs and 2 Zoms = 381cm  
 Shelf C: 3 Baxs, 2 Jibs and 1 Zom = 146cm 6mm

2. Annabella and Anton are making daisy chains for their favourite teachers. They pick daisies from the field at random. The different lengths of the daisies are shown below.

24mm, 3  $\frac{1}{2}$  cm, 8cm, 123mm, 5  $\frac{1}{2}$  cm, 77mm

Not drawn to scale

Annabella: My daisy chain is more than 150mm longer than yours. The total length is no greater than 50cm.

Anton: In total, I used five daisies in my chain, which is one more than you used.

Each daisy chain contains at least three different lengths of daisy. Explore possible combinations of the lengths of daisies that they could have used.  
 Anton's chain must be less than 350mm. Various answers for Anton, for example: 24mm + 35mm + 80mm + 77mm + 24mm = 240mm.  
 To be at least 150mm more than 240mm, Annabella's must be more than 390mm (but still less than 500mm). Various answers for Annabella, for example: 123mm + 77mm + 123mm + 80mm = 403mm.

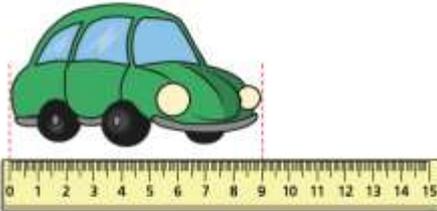

# Maths Answers Lesson 4:

## Subtract lengths

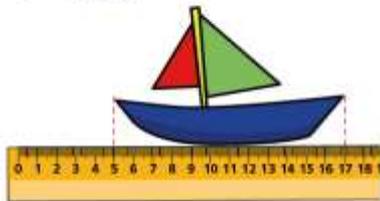

1 Complete the sentences to describe the lengths of the objects.

a)

The toy car is  mm long.

b)

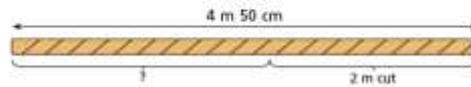

The toy boat is  cm long.

c) The toy boat is  cm longer than the toy car.

The toy car is  mm shorter than the toy boat.

2 Jack's rope is 4 m 50 cm long.  
He uses 2 m to make a swing.  
How long is his rope now?

Jack's rope is now  m and  cm long.

3 Tommy, Rosie and Annie each measure their height.

a) What is the difference in height between Tommy and Rosie?

b) Annie is 30 mm shorter than Rosie. What is Annie's height?

© White Rose Maths 2019

4 Nijah buys 5 m of ribbon.  
She uses 78 cm of the ribbon to decorate a bag.  
How much ribbon does she have left?

m and  cm

5 Complete the number sentences.

a)  $2\text{ m} - 50\text{ cm} =$   cm

b)  $85\text{ mm} - 2\text{ cm} =$   mm

c)  $9\text{ cm } 5\text{ mm} - 20\text{ mm} =$   cm and  mm

d)  $100\text{ mm} -$   cm  $= 6\text{ cm}$

6 Huan has a 10 m ball of string.

He uses 50 cm to replace his shoelace.  
He uses some more of his string to make a bow for his arrows.  
He has 7 m and 45 cm of string left.  
How much string did Huan use to make his bow?

m and  cm

7 Fill in the empty boxes so that each row and column adds up to 2 m.

|  |                                    |                                    |
|--|------------------------------------|------------------------------------|
| 50 cm                                  | <input type="text" value="1 m"/>   | 50 cm                              |
| <input type="text" value="1 m 15 cm"/> | <input type="text" value="15 cm"/> | <input type="text" value="70 cm"/> |
| <input type="text" value="35 cm"/>     | <input type="text" value="85 cm"/> | <input type="text" value="80 cm"/> |

Talk about what you did with a partner.

Are your answers the same?

Create your own problem like this using a different total.

Ask a partner to find the answer.

|  |  |  |
|--|--|--|
|  |  |  |
|  |  |  |
|  |  |  |

© White Rose Maths 2019

## Red task:

### Developing

- 1a. B. 15m
- 2a. 1m and 25cm or 125cm of string left.
- 3a. 4m
- 4a. 220cm > 210cm

### Developing

- 1a. Ben has calculated statement B incorrectly because  $290\text{cm} - 80\text{cm} = 210\text{cm}$ .
- 2a. The red ribbon is 1m and 15cm and the blue ribbon is 90cm long.
- 3a. Finn's method is correct because he has realised that he needs to convert one of the lengths so that both lengths use the same units of measurement before he subtracts.

## Gold task:

### Greater Depth

- 9a. C. 322cm
- 10a.  $2\frac{3}{4}$  m of wool left over.
- 11a. 2m and 93cm
- 12a. 504cm < 513cm

### Greater Depth

- 7a. India has calculated statement C incorrectly because  $7\frac{1}{2}\text{m} - 500\text{cm} = 2\text{m}$  and 50cm.
- 8a. Fiz's throw was 92cm shorter than George's throw because Kirsti's throw measured 1m and 68cm or 168cm and George's throw measured 260cm or 2m and 60cm.
- 9a. Kathryn's method is correct because she has converted  $5\frac{3}{4}\text{m}$  into 575cm before subtracting.

## Deepen the Moment:

1. Ruth has arranged all of the items from inside her pencil case into a horizontal line which measures 123cm.

The scissors have the longest length. The pot of glue and the pen both measure 170mm, which is 20mm less than the calculator. The paintbrush is 5mm longer than the highlighter but 5mm shorter than the calculator. The rubber has the shortest length. All of the lengths are in the 5 times table.

When Ruth goes into the kitchen to make a drink, her little brother takes two items away and rearranges the straight line. Now, the line is between 85cm and 91cm long.

Explore which two items Ruth's brother could have taken away. Various answers, for example: He could have removed the glue pot and the highlighter.  $123\text{cm} - 17\text{cm} = 106\text{cm}$ ,  $106\text{cm} - 18\text{cm} = 88\text{cm}$ .

2. Arrange the set of loop cards below so that each end is matched to an equal value.

|  |                                       |                             |                     |                                       |                                       |
|--|---------------------------------------|-----------------------------|---------------------|---------------------------------------|---------------------------------------|
| 7m and 72cm - 685cm                    | $1\frac{1}{2}\text{m} - 450\text{mm}$ | 7m - $2\frac{3}{4}\text{m}$ | 8m and 11cm - 484cm | 343cm - 440mm                         | 4m and 57cm - 342cm                   |
| $3\frac{3}{4}\text{m} - 1152\text{cm}$ |                                       |                             |                     |                                       | 571cm - 342cm                         |
| 299cm - 370mm                          |                                       |                             |                     |                                       | 8 $\frac{1}{2}\text{m}$ - 4m and 25cm |
| $1\frac{1}{4}\text{m} - 450\text{cm}$  |                                       |                             |                     |                                       | 4m - 80mm                             |
|  |                                       | 810cm - 1m and 11cm         | 730cm - 250mm       | $1\frac{1}{4}\text{m} - 258\text{cm}$ |                                       |

The loop cards should be matched as shown above.

## Maths Answers Lesson 5:

### Mark scheme

| Qu. | Requirement | Mark | Additional guidance |
|-----|-------------|------|---------------------|
| 1   | 8           | 1m   |                     |
| 2   | 150         | 1m   |                     |
| 3   | 48          | 1m   |                     |
| 4   | 195         | 1m   |                     |
| 5   | 892         | 1m   |                     |
| 6   | 24          | 1m   |                     |
| 7   | 44          | 1m   |                     |
| 8   | 8           | 1m   |                     |

| 10  | 515         | 1m   |                     |
| 11  | 88          | 1m   |                     |
| 12  | 386         | 1m   |                     |
| 13  | 718         | 1m   |                     |
| 14  | 198         | 1m   |                     |
| 15  | 36          | 1m   |                     |
| 16  | 5           | 1m   |                     |
| 17  | 292         | 1m   |                     |
| 18  | 12          | 1m   |                     |
| 19  | 150         | 1m   |                     |
| 20  | 42          | 1m   |                     |
| 21  | 240         | 1m   |                     |

## English Answers Lesson 1:

### The Old Teacher by Alan Ahlberg.

**Key vocabulary:** Stock-cupboard, Hymn-books, Wendy house.

#### Retrieval

1.) Where did the old teacher sleep?

The old teacher usually slept in the stock-cupboard

2.) What did the children bring her to eat?

The children brought her apples to eat

#### Inference

3.) Do you think that the old teacher was happy living as she did? Explain your reasoning.

If yes, answers may include that she continued to live there and had lived there for many years / her basic needs were being met; the poem says that she had food, shelter, somewhere to sleep, somewhere to wash / She had been a teacher for many years, and may have loved the school so much that she chose to live there / there is nothing in the poem to suggest that she wanted things to be any different.

If no, answers may include that she could have been lonely, the stock-cupboard was probably not very comfortable / she would have been cold with paper for blankets, hungry with only apples to eat, dirty with only the goldfish water to wash her face in / the Wendy house would have been small, even for an old lady to live in.

4.) Do you think a Wendy house is an appropriate place for an old lady to live? Why / Why not?

Yes it is – answers may include that the Wendy house is cosy / it is free to live in / it is a small place to keep clean and tidy and any other reasonable explanations.

No it is not – answers may include that the Wendy house is too small for anyone to live in properly / it does not have running water and electricity and any other reasonable explanations.

#### Vocabulary

5.) What does “as a rule” mean in line 3?

As a rule means usually

6.) What is a Hymn-book? Where else, other than school, might a Hymn book be used?

A hymn-book is a book that contains religious songs and music

#### Deepen the Moment

Why do you think that the teacher lived in school? Write at least two reasons to support why she might live there.

Reasons could include that she had no house of her own / not enough money / that she loved the school / that she wanted to look after the school / she worked so hard at being a teacher each day, that it was easier to live in school than to travel each day / her house was too far away to travel every day, so it was easier to stay at the school

## English Answers Lesson 1: Red Task

### The Old Teacher by Alan Ahlberg

#### ANSWERS

**Key vocabulary:** Stock-cupboard, Hymn-books, Wendy house.

#### Retrieval

1.) Where did the old teacher sleep?

The old teacher usually slept in the stock-cupboard.

2.) What did the children bring her to eat?

The children brought her apples to eat

#### Inference

If yes, answers may include that she continued to live there and had lived there for many years / her basic needs were being met; the poem says that she had food, shelter, somewhere to sleep, somewhere to wash / She had been a teacher for many years, and may have loved the school so much that she chose to live there / there is nothing in the poem to suggest that she wanted things to be any different.

If no, answers may include that she could have been lonely, the stock-cupboard was probably not very comfortable / she would have been cold with paper for blankets, hungry with only apples to eat, dirty with only the goldfish water to wash her face in / the Wendy house would have been small, even for an old lady to live in.

#### Vocabulary

4.) What does "as a rule" mean in line 3? Does it mean usually, sometimes or never?

As a rule means usually.

5.) What is a Hymn-book?

A hymn-book is a book that contains religious songs and music

#### Deepen the Moment

Why do you think that the teacher lived in school? Write at least one reason to support why she might live there.

Reasons could include that she had no house of her own / not enough money / that she loved the school / that she wanted to look after the school / she worked so hard at being a teacher each day, that it was easier to live in school than to travel each day / her house was too far away to travel to school each day.

## English Answers Lesson 2:

### Task 2:

Daniel's bedroom was a terrible mess! It looked like a tornado had passed across his room and turned everything upside-down! Across the floor, toys were scattered and Daniel's favourite superhero toy had been thrown under the bed. A pile of old magazines were precariously stacked behind the bedroom door, waiting to be knocked over. By his bed, a small table stood, covered in empty sweet wrappers and an old drink carton. Feeling horrified, Daniel's mum hadn't entered the room for several days due to the mess. Behind the wardrobe doors, piles of unfolded and dirty clothes lay screwed up waiting to be sorted. 'I want this bedroom cleaned by tomorrow,' demanded his mum. Daniel walked into his room and lay on his bed.

'I'll do it first thing in the morning,' he thought to himself as he shoved another dirty sock beneath his pillow.

### Task 3: Any sentences about the picture that include one of these words

## Prepositions

beside      in front of      behind      down      between  
 around      by      into      at      beyond  
 onto      across      beside      on      inside  
 off      in      beneath      near      outside  
 to      opposite      next to      over  
 up      toward      upon      round      above  
 below      underneath      through      towards  
 under

## English Answers Lesson 5:

### Task 1

Look at the sentences below and rewrite the sentences so that they are written formally.

Tilly always butts in on our chats.

Tilly often interrupts our conversations.

---

The Kids in Class 4 were mega happy about their trip.

The children in class 4 were extremely happy about their trip.

---

I can't work out what his job is.

I am finding it difficult to imagine what his job might be.

Rambleswisck  
PT5 7AP

Dear Amy,

Thank you for your email regarding my purchase of a plot of land. I have to say, however, that I am deeply disappointed with the lack of access to this land. I applied for this land because I would have liked to own a little piece of the Scottish Highlands. Sadly this land was at the very top of a highly inaccessible mountain and I feel I have wasted a precious £300. I am angry and want my money back!

Your comments would be appreciated.

Regards

Sarah Webb

- *The date*
- *The name of the recipient*
- *A formal greeting*
- *Appropriate tone*
- *A formal close*

## Reading for Productivity Answers

### Music:

#### Answers
